DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, drawn to a method of manufacturing a memory device, classified in class 365, subclass 63.
 - II. Claims 6-7, drawn to a method of operating a memory module, classified in class 365, subclass 185.18.
 - III. Claims 8-14, drawn to a method of configuring a memory, classified in class 365, subclass 255.7.
 - IV. Claims 15-21, drawn to a method of configuring a system, classified in class 365, subclass 51.
 - V. Claims 22-33, drawn to a memory module and a memory system comprising a memory module, classified in class 365, subclass 185.11.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions V and I-IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product of Group V can be used in a materially different process of using that product such as different methods of Groups I-IV.

3. Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as use for manufacturing a memory device, invention II has separate utility such as use for operating a memory module, invention III has separate utility such as use for configuring a memory, invention IV has separate utility such as use for configuring a system. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, different search and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Huan Hoang whose telephone number is (571) 272-1779. The examiner can normally be reached on Mon-Fri 8:30AM-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hoai Ho can be reached on (571) 272-1777. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
